

## RESIDENCE INN

The Chattanooga Residence Inn renovation encompassed both public areas and guestrooms. The Prototypical InnFusion 2 Decor FF&E package and Gen 8 package were the basis for this design. The existing traditional FF&E was replaced with modern polished pieces to update and refresh the entire property. In the Hearth Room, new soft seating was added to the space along with a new built-in communal table, offering guests both intimate seating and seating for larger groups. New contemporary artwork and accessories were added in warm vibrant hues. All existing lighting was replaced with new stylish lighting. The millwork, including the buffet, registration and market were all re-faced to reflect a more contemporary design. Stainless accents are used throughout the area. All new finishes and graphics also help to enhance the clean modern design.

Rich jewel tone colors and stylish new furniture give the guestrooms a vibrant contemporary feel. The kitchenette area has all new stainless steel appliances, new granite counter-

tops and new decorative sheet vinyl flooring. The existing breakfast bar/counter millwork was removed and replaced with a free-standing table and dining chairs to give the space a more residential feel. A dramatic pendant now hangs above the new dining table.
